

Pyramid glass

The pyramid for stylish settings

- High-quality product
- Second drainage level
- Good thermal insulation
- Appealing design
- Flexible sizes
- For new buildings and renovations

The INDU LIGHT pyramid glass comprises a pyramid-shaped cover element and a kerb, and can be supplied as a rigid structure and as a ventilated unit.

Superlative thermal insulation characteristics

The cover is made of slimline aluminium extruded profiles set at an angle of 30°, delivering excellent thermal insulation through the thermal separation of profile sections. This contemporary form of double glazing comprises floatglass and composite safety glass (CSG), incorporated in a cover frame and with gasket seals embedded in the profile sections. As an option, tinted glass panels and single-glazed safety glass (ESG) can also be used as an optional form of solar protection.

The aluminium profile sections are painted in pure-white RAL 9010, but other RAL colours may also be selected. In the ventilated version, chain drives can be used, optionally in concealed versions, and also as versions integrated in the kerb. It is based on a kerb made of GFP or a steel kerb with the option of pre-installed thermal insulation.

Technical details							
Nominal sizes*	80 x 80	90 x 90	100 x 100	120 x 120	150 x 150	180 x 180	200 x 200
Double glazing	Float/CSG, optional: ESG/CSG or tinted glass						
INDU LIGHT Glass rooflight	Double glazing U_{total} : 1.1 W/m ² K, sound reduction index: 37 dB						
Paint coating	Pure white RAL 9010, optional: other RAL colours						
Rigid glazing version	Optional: ventilated, concealed chain drive / ventilated, integrated chain drive / shading, black-out
